Subsurface waste disposal systems must be operated and maintained in a manner so as to prevent nuisance or health hazard due to system failure.

It is unlawful to discharge any hazardous chemicals or substances into subsurface waste disposal systems. Included are paints, thinners, gasoline and chlorinated hydrocarbon solvents such as TCE, sometimes used to clean failed septic systems and auto parts. (Env-Ws 1503.04)

Hi Tocky,

I will let you arrange the times for any coordination as I would be the easiest to schedule around any arrangements that you make.

I will go over the cost with Linda and fill out the form for the town and RCCD and submit it tomorrow September 28, 2010.

I do appreciate the effort on your part to assist in making my septic system feel better.

Subject: Septic Design

Ralph,

Attached is the North Hampton test pit application we discussed.

My contact info is listed below.

I look forward to meeting you and will call ahead if I have a window where I can stop by to have a better look at your situation.

It occurs to me that much could be gained from meeting with you at the site with Alden while he pumps the tank, and after a year without being pumped, I would think your leach field would be happy to have a breather as well. If you would you be willing to have him come out, I could join you both for a good head start on the design process. I think I will take it upon myself to recommend that we do this. It is Chris-Co Construction and the number is 436-0315. If you are the easiest of the 3 of us to coordinate, then Alden and I can touch base for a mutually agreeable time and let you know. Do this sound OK?

Thanks very much,

Tocky
